

CHANGE IN FILE STATUS
APPROVAL FORM

DATE July 27, 1987

CURRENT FILE NO. PRO/041/013

RECOMMENDED FILE NO. DOE/041/~~007~~ 005

COMPANY AND MINE NAME Aggre-Insulite Inc, Aggreelite 1 Mine

REASON FOR CHANGE IN FILE STATUS

The MR-1 application for this site was received by the Division on May 10, 1985. We responded with a deficiency letter on July 31, 1985. No response to this letter was ever received. A November 31, 1987 telephone conversation, Mr. Gerald Park informed Tom Munson that the company was currently pursuing funding for the project and that he had no idea when this might occur.

In a December 18, 1985 letter, Mr. Park indicated that any mining activity on the site we be conducted under the 2 acre exemption, and that the mining permit application would be completed as plans for mine development are finalized.

The Minerals Team visited the above referenced mine on June 11, 1987. The disturbance consists of a 1/6 acre pad area and a small cut into the hillside approximately 200 feet long. It appears the the site has been inactive for several years as the pad area has been partially revegetated with native species. Disturbance is minimal at this site. The current level of development is of an explorative nature only.

✓ I recommend that the status of this operation be changed to a DOE and that the operator be notified of the same. This way, once the proposed rules are finalized, the operator will be notified that the file will be deactivated pending submission of a SMO/MO.
